WORK EXPERIENCE

Associate Project Lead KFin Technologies

04/2024 - Present

Tasks

- **Loan Against Mutual Fund (LAMF) Dashboard & Core API Development.** Built an interactive, real-time dashboard for LAMF transactions, Developed the back-end interface for pledging and un-pledging investors mutual funds folios, enabling clients to view live transaction statuses and detailed payout reports in dashboards. **Technologies:** Node.js, ExpressJS, Socket.io, MongoDB, MS-SQL, TypeScript.
- **Optimized Core APIs by converting .NET APIs to Node.js for performance improvements.** reduced average API response time from > 30 seconds to avg 2 seconds by implementing asynchronous processes in Node.js. Designed APIs for efficient data validation and insertion into MS-SQL Database, improving reliability and throughput by > 75%.
- **Database management and optimized queries.** Utilized MongoDB for scalable logging and caching solutions, reducing load on the primary MS-SQL database by 40%. Improved query efficiency and data handling by optimizing complex SQL queries in MS-SQL.

Software Engineer Tech Mahindra

03/2021 - 12/2023

Hyderabad

Tasks

- **Cross-Functional Development:** Collaborated with teams to develop and implement projects for Three UK Networks and Genentech; conducted thorough testing and debugging to ensure application quality and reliability.
- **Application Development and Project Management:** Developed and maintained applications using Python, JavaScript, and SQL; worked with product managers and stakeholders to gather requirements, define project scope, and meet deadlines.

Software Engineer Intern TECH MAHINDRA

12/2020 - 03/2021

Bengaluru

EDUCATION

B.Tech - Computer Science Engineering REVA University, Bangalore

2016 - 2020

SKILLS

Nodejs

PROJECTS

Loan against mutual fund core apis and Dashbaord

- A interactive real-time Dashboard application for un-pledging, to view transaction status and payout report
- Features - A minimal design, facilitating seamless report generation and facilitates un-pledging of mutual funds through dashboard
- Technologies used - Node.js, ExpressJS, Socket.io, and MongoDB, MS-SQL, Typescript

Comms Dispatcher

- Developed a **high-concurrency communication microservice** for delivering Emails, SMS, and WhatsApp messages using **Kafka** for distributed message processing.
- Designed and implemented REST APIs enabling multiple internal applications to send messages through a unified platform.
- Built an **interactive dashboard** to monitor delivery statistics, message status, and API usage in real time.
- **Technologies:** Java Spring Boot, Kafka, MongoDB, React, REST APIs.

Comms Composer

- Built a **drag-and-drop report designer application** using **React** with **Fabric.js** to create custom report templates and components.
- Integrated APIs as data sources and datasets, generating **JRXML** templates dynamically.
- Implemented backend logic in **Java Spring Boot** to produce dynamic **PDF reports** using JasperReports.
- **Technologies:** React, Fabric.js, Java Spring Boot, JasperReports, REST APIs.
